

More and more organizations are adopting this approach. According to Gartner research, by 2022, 90% of all software development projects will be following DevSecOps practices (up from 40% in 2019).<sup>2</sup>

## IAST as catalyst for DevSecOps transformation

IAST is one of the few AppSec tools that can support a digital-first strategy without adding time to the process. In other words, it minimizes the attack surface without slowing down development.

Enterprises use hundreds of apps and update or release new ones on a weekly or daily basis. Developers depend on automated

Synopsys helps development teams build secure, high-quality software, minimizing risks while maximizing speed and productivity. Synopsys, a recognized leader in application security, provides static analysis, software composition analysis, and dynamic analysis solutions that enable teams to quickly find and fix vulnerabilities and defects in proprietary code, open source components, and application behavior. With a combination of industry-leading tools, services, and expertise, only Synopsys helps organizations optimize security and quality in DevSecOps and throughout the software development life cycle.
