Assessing open source and third-party software

Open source software is an important part of a target's security story, but it has the potential to contain legal risks as well. Typically, 75% or more of a target company's proprietary code is made up of open source and other third-party components. With literally millions of such useful components freely available on the internet, it's understandable that developers would avail

Synopsys provides integrated solutions that transform the way you build and deliver software, accelerating innovation while addressing business risk. With Synopsys, your developers can secure code as fast as they write it. Your development and DevSecOps teams can automate testing within development pipelines without compromising velocity. And your security teams can proactively manage risk and focus remediation efforts on what matters most to your organization. Our unmatched expertise helps you plan and execute any security initiative. Only
